$RIPP IS LIVE ON PUMP.FUN · BUY NOW ↗

RIPP LABS · WHITEPAPER v1.0 · NOVEMBER 2026

The autonomous TRADING ENGINE.

RIPP is a one-of-a-kind trading machine: a Hive of agents feeding one Core that hunts, sizes, enters and exits on its own — and turns its own wins into $RIPP buybacks.

DOWNLOAD PDF READ THE LORE

01 Abstract

Solana meme markets move in seconds and most new tokens are built to rug. Human traders lose to bots on speed and to developers on information. RIPP is an autonomous trading engine built for that arena: a Hive of agents watching the chain and the timeline, one Core making every decision, and strict risk rules on every order.

$RIPP is the token at the center of it. For the first 30 days (until Dec 21, 2026), 100% of the profit from every winning trade the engine closes buys $RIPP — after that it's 25% of every win, for good. Every buyback comes off the open market and goes into a public reserve. RIPP Genesis NFTs unlock the engine itself — access grows with rarity, up to Legendary holders getting their own RIPP trading for them.

02 The problem

Speed

Runners form and die in minutes. By the time a coin trends on the timeline, the move is gone.

Rugs

Most new launches are designed to drain: thin pools, bundled supply, developers holding the exit.

Emotion

People chase pumps, hold losers and never take profit. Discipline is the edge almost nobody has.

03 The RIPP Engine

RIPP is not one bot — it is a machine of specialised desks feeding one brain. Each desk has its own superpower; the Core weighs them together and acts.

The Core

One decision brain. Every signal lands here; every entry, size and exit is decided here — with no emotion and no hero bags.

The Hive

A swarm of agents reading X, Telegram and the chain around the clock — narratives, callers, holders and liquidity — feeding a constant stream to the Core.

Meme Hunter

Scans every new Solana token, rates the developer, holders, liquidity and crowd, then enters and exits on its own: in before the run, out before the rug.

Copy Engine

Shadows a swarm of up to 50 high-performing wallets. The Hive hunts early buyers of tokens that ran, scores them on win rate and profit, and rotates out the losers. When a tracked wallet buys, RIPP

Launch Sniper

Watches brand-new launches from proven creators and fast movers, validates them, and enters early — before the timeline catches on.

Market Trader

A separate desk for Bitcoin, the stock market and options — trend-gated, sized by volatility, with disciplined exits.

mirrors it in seconds; when it sells, RIPP is already out.

04 Risk architecture

Getting in is easy. Getting out — before the developer, the bundle or the bots — is the whole game. Every automated order passes the same gates.

Rug shield

Every automated buy must clear a minimum pool size, a minimum token age and a pool-to-market-cap sanity check. Mint and freeze authorities are hard blocks.

Instant exits

Hard stop-losses fire immediately, take-profits ladder out, and a moonbag rides the runners. LP-drain and wallet-cluster exits trigger emergency sells.

Sizing caps

Each trade is a small, capped clip of the wallet. No single position can sink the engine.

Pacing & daily caps

A maximum number of new buys per hour, a daily loss cap and a wallet reserve floor that is never traded.

Price-impact gate

Quotes are checked before submit — if the fill would move the price too far, the order never goes out.

Kill switch

The operator can pause entries, halt the engine or flatten everything in one action.

05 $RIPP token

$RIPP is the crown of the ecosystem: the token the engine buys back, the key to premium strategy modes, and the voice in what RIPP builds next.

NETWORK	Solana (SPL)
LAUNCH	Fair launch on Pump.fun · November 6, 2026
PRESALE / TEAM ALLOCATION	None
CONTRACT	9doLvcTPK9wrEi8sSwXgG72ftMs6U8R9YTrgpSStqrEe
TREASURY	Bag held under a public 30-day pledge — the engine refuses to sell it before unlock
OFFICIAL CHANNELS	t.me/Ripplabs · x.com/RippLabs_

Access

Hold $RIPP to unlock premium strategy modules and compute.

Rewards

Earn from performance pools and ecosystem incentives.

Governance

Vote on new strategies, risk defaults and the roadmap.

06 The buyback flywheel

RIPP is the first autonomous trading engine that turns its own wins into buybacks of its own token. The more the engine wins, the more $RIPP it buys. Buybacks are held — not burned — and flow straight into the Vault Reward Pool, which funds Vault staking prizes, community rewards and promotions.

01

THE ENGINE WINS

A trade closes in profit — memes, copy trades, Bitcoin or stocks.

02

100% IS SET ASIDE

For the 30-day launch boost (until Dec 21, 2026) all of that profit is routed out of the trading wallet the moment the trade closes — 25% after that.

03

BOUGHT ON THE MARKET

It is swapped for $RIPP through the Jupiter aggregator — open-market buy pressure, not minted supply.

04

INTO THE VAULT POOL

Bought-back $RIPP goes straight into the Vault Reward Pool — paid out as Vault staking prizes, community rewards and

promotions — and every buyback is posted with its transaction.

100%
FIRST 30 DAYS
All of the profit from every engine win buys $RIPP until Dec 21, 2026.

25%
AFTER DEC 21
Then 25% of every engine win's profit buys $RIPP, permanently.

0.5 SOL
PER BUY
Big wins are bought back in 0.5 SOL chunks to keep price impact low.

1%
HOLDERS' OWN RIPP
NFT holders who run their own RIPP buy back 1% of its winning trades into $RIPP — holders must keep $RIPP locked in the Vault to run it.

Reserve wallet: `CiWT3x87vDTTf82FocNsxqqoakXVASNncZVxVfzy7EgA`

THE VAULT: 7-DAY LOCK · 10 WINNERS

Holders lock at least 1,000,000 $RIPP in the 7-day Vault. When 100 wallets are in, the Vault seals and its 7-day timer starts. When it opens, 10 wallets are drawn with a published, verifiable seed and share the SOL prize, currently 1.5 SOL (0.15 SOL each). The prize grows over time as engine buybacks fill the Vault Reward Pool. Every wallet has the same shot, whatever it locked above the minimum, and wallets that stay locked without winning double their chance next round.

Genesis NFT holders: to run your own RIPP and its 1% buyback of winning trades into $RIPP, you must keep $RIPP locked in the Vault.

7 DAYS
LOCK

100
WALLETS TO SEAL

10
WINNERS PER VAULT

1.5 SOL+
SHARED PRIZE, GROWING

07 Genesis NFTs & access by rarity

RIPP Genesis is the first 25 pieces of a 1,000-cap collection: 30 SOL each, two per wallet. Each NFT is a membership credential — the rarer the piece, the more of the engine it unlocks. Access is cumulative: every tier keeps everything below it. Mav, the 1/1 Legendary Bull, is the collection's mascot and holds the final word on risk in the Council.

2	3	5	7	8
LEGENDARY	EPIC	RARE	UNCOMMON	COMMON

COMMON CORE

Hive calls — Live meme calls straight from the hive, in the holders' feed and group chat
Holder badge + community — Your verified RIPP badge and the RIPP Labs crew

UNCOMMON CORE+ · everything below, plus

Copy trading — Mirror all the top influencer wallets the hive follows, within seconds
Voice alerts — Spoken buy, sell and take-profit calls the moment they happen

RARE HIVE · everything below, plus

Full meme trading automation — The Solana meme engine on your own wallet: rug filter, sizing, 2x take-profit and moonbag exits
Runner Radar — See the runners forming before the timeline does

EPIC HIVE PRO · everything below, plus

Bitcoin, Nasdaq + all futures engines — Daily-trend gating, Mag 7 bias, liquidity-sweep entries and winner stacking

LEGENDARY ELITE · EVERYTHING · everything below, plus

Options + stocks engine — Strike, expiry and Greeks picked by the hive; stock trading included
Hive growth automation for your socials — Your own X posts, engine clips, outreach and Telegram group bot running 24/7 (rolling out)
Everything RIPP does — Every engine, every feed, every new power the day it ships

08 Transparency

Public trade log

Every entry and exit is logged in public at ripp.xyz.

On-chain receipts

Buybacks are posted with their transaction; the reserve wallet is public.

The contract address and announcements come only from t.me/Ripplabs and x.com/RippLabs_.

09 Where we're going

01 IGNITION — IN PROGRESS

- The Core is live: Meme Hunter, Market Trader (Bitcoin + stock market), Wallet Tracker, Launch Sniper and the Hive
- Every entry and exit logged in public at ripp.xyz
- RIPP Telegram channel, community chat and X live — the lore and Mav, our 1/1 Legendary mascot, revealed
- Launch countdown: $RIPP goes live Friday, November 6 at 12:00 PM ET

02 THE CROWN DROPS — $RIPP LAUNCH

- $RIPP fair-launches on Pump.fun — no presale, no team allocation
- Official contract address posted only in t.me/Ripplabs and on x.com/RippLabs_
- DexScreener verified profile, logo and links
- Push to graduation and open trading

03 GENESIS — 72 HOURS AFTER LAUNCH

- RIPP Genesis NFT mint opens — 25 pieces
- Genesis founder badge, serial and first access to every future drop
- Holder dashboard goes live, unlocked by your NFT

04 THE HIVE OPENS — HOLDER ACCESS

- Tiered access by rarity: Core, Core+, Hive, Elite
- Hive signals, research feeds and enhanced alerts for holders
- $RIPP utility — hold $RIPP to unlock premium strategy modes
- Full RIPP collection rolls out toward the 1,000 cap

05 YOUR OWN RIPP — LEGENDARY

- Legendary holders get their own RIPP trading for them
- Every holder's own RIPP buys back 1% of its winning trades into $RIPP
- Personal desks: memes, Bitcoin and the stock market under one machine
- Mobile alerts for every move your RIPP makes

06 EVERY ANGLE — EXPANSION

- More markets and more chains plugged into the Core
- More Hive sources feeding the Core around the clock
- Community votes on the next desk RIPP takes on

10 Risk disclaimer

This whitepaper is for information only. It is not financial, investment, legal or tax advice, and it is not an offer or solicitation to buy or sell any token, NFT or security.

Crypto assets and meme tokens are extremely volatile and can lose all of their value. Automated trading can and does lose money; past behaviour of the engine does not predict future results. Smart contracts, wallets, RPC providers, exchanges and aggregators can fail or be exploited.

$RIPP and RIPP NFTs carry no promise of profit, yield, dividends or price appreciation. NFTs are digital collectibles and membership credentials that unlock software features only. Features, tiers and timelines described here may change.

Only use funds you can afford to lose entirely, check that crypto assets are legal where you live, and do your own research.

RIPP NFTs are digital collectibles and membership credentials for the RIPP platform. Holding one unlocks software features only — no trading profits, investment returns or token appreciation are promised.
